Desired length of contract (please indicate): PRESENT YEAR ONLY TWO YEARS **THREE YEARS** FOUR YEARS

Garbage chute, compactor and bin cleanings are a necessary part of preventative maintenance. Garbage chute cleanings are something many apartment buildings, offices and commercial sites neglect, this can be harmful for the tenants due to the pathogens and bacteria found in these areas. Evolution building services comprehensive garbage chute cleaning services will reduce odour, reduced health risks to tenants, help reduce unwanted insects and increase the longevity of the equipment. We recommend garbage chute cleanings between 2 to 4 times per year. These cleanings should be spread evenly throughout the year but some buildings may find a benefit in arranging their cleanings around the warmer months.

Should you have any questions regarding this quote, please contact kaven@evolutionbuildingservices.ca

Notes:

- Quote valid for 30days
- Customer to provide water source and 110V outlet in garbage room
